Please contact Global IFS for physical color samples. This printed palette is representational only – do not use as a control sample. This is a natural porcelain product subject to slight variations in color and shading. Porcelain may vary from one piece to another. Some tiles have a directional pattern. Exact duplication of samples is not possible; this digital sample represents the average color in the finish specified. No guarantee can be made of an exact porcelain match. ELEVATE[™] Porcelain Flooring System panels measure 600mm x 600mm.
